Inventory Process Overview

Inventory parts are charged to a Work Order through the Counter Release screen. This screen can be manually setup or the process can be initiated through the Material Request screen or Pick Ticket screen. Instructions for all 3 screens are outlined below.

Material Request Entry

- 1. Title Block
 - a. Material Request # is auto-generated. Do Not change it.
 - b. The description field is optional. Once saved, it will show the Shop that is listed on the submitter's User Profile. Warehouse will sometimes add information here.

- 2. Requestor Block Required
 - a. Requested By Employee number of the technician requesting the material.
 - b. Date Needed Date the material needs to be delivered or picked up
 - c. Deliver To Employee number of the technician requesting the material
- 3. Add Line Item
 - Click Add to enter the Line Items a. AiM Add New Line Item = Next Cancel Please Select: 2 Browse Catalogs Add Stock Part by Warehouse Add Catalog Part by Vendor Add NonStock Part Add Equipment Rental Add Inventory Kit

**If unsure if item is inventory, search on the Inventory Part Screen.

- 4. Choose the type of line item to be added
 - a. *Add Stock Part by Warehouse* items kept in inventory
 - b. *Add Catalog Part by Vendor* item listed in a vendor catalog in AiM
 - c. *Add NonStock Part* item that needs to be purchased
- 5. Click Next
- 6. Complete the Line Item screen.
- 7. Add additional line items if needed.
- 8. Click Save

Pick Ticket

The Pick Ticket is a form of reservation of parts from a warehouse. It is used to populate the Counter Release. Using Pick Tickets allows for staging materials.

If the Material Request screen is used, the Pick Ticket screen must be used to carry the information to the Counter Release screen.

Pick Ticket - By Loading Material Request AiM Inventory Add Menu In the Inventory Module, look at the Menu Q L **Inventory Part Profile** Click the Paper Icon **h** next to Pick Ticket Counter Release Q Ŀ Q 🖹 Counter Return Q Pick Ticket Warehouse Iransfer Q 🔍 📗 Inventory Adjustment AiM Pick Ticket ROLETEST About Help Logout Cancel Created By ROLETEST On 06/30/2016 02:34 PM Status 29167 OPEN Q Last Edited by ROLETEST On 06/30/2016 02:34 PM Extra Description 1 Warehouse Q (2) Shipping Information Notes Log User Defined Fields Date Needed = Status History Related Documents Work Order Region Q Q Facility Q Phase Property Q Location Q 3 Line Items Line Part Created B 29167 Last Edited b 1. Maintaining Inventory Stock

Inventory can be increased through the following methods -

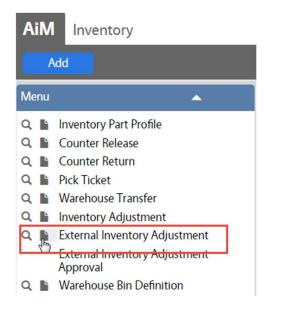

- External Inventory Adjustment
- Warehouse Transfer
- Physical Counts
- Purchasing Disbursement

The first 3 will be explained in this packet.

External Inventory Adjustment

The External Inventory Adjustment screen adjusts inventory cost and count when the acquisition of the inventory occurs outside of AiM.

These transactions must be approved through the External Inventory Adjustment Approval screen.

- In the Inventory Module, look at the Menu
- Click the Paper Icon invest to External Inventory Adjustment

Physical Count

Physical Count Generator

The Physical Count Generator screen produces a list of parts to be manually counted. Lists are generated based on bins or Cycle Codes that were setup on the Inventory Part Profile screen. The following must be setup in order to use the Physical Count Generator.

- Physical Count Status
- Cycle Code
- Frequency (Preventive Maintenance Module)
- Cycle Code identified on Inventory Part Profile
- Start Date on the Warehouse Bin Definition screen

Inventory Transactions - 29

Enter Physical Count Data

After counting, return to the Physical Count Worksheet in AiM

- For each part, complete the Count Date and Inventory Count fields

 If no date is entered, it will default the current date.
- Once all counts are entered, change the Status to FINALIZED
- Click Save

Review and Approve Physical Count

Once counts are entered, they need to be reviewed and approved.
